

MTA APPROVED ROOFING MATERIALS

The following is a list of roofing materials currently approved by the MTA Design Committee. All homeowners are reminded that, prior to installing any new roofing material, Design Approval is required. Design Approval is not required to simply repair or replace a portion of roofing material, provided the same type of material currently on the roof is used & the repairs do not in anyway alter the exterior appearance or roofline of the residence.

PITCHED ROOFS

***NOTE: For Metal Roofing Material: MTA requires a letter from the manufacturer stating the roofing color has been muted with a no gloss finish. All metal roofing must be applied with the proper underlayment over a solid substrate and adhered via mechanical screw.**
